

Athaalla Rayya Genaro Iswandoko

Surabaya, East Java, Indonesia

gennarorayya05@gmail.com | +62 82231065750 |

linkedin.com/in/rayyagenaro

Fresh Graduate from the Department of Information Systems at ITS with an interest in Web Development, Data Analytics, Data Science, and Machine Learning. Experienced in technology-based organizations and projects, with strong communication, leadership, and problem-solving skills. Accustomed to working in teams, quick to adapt, and highly motivated to continue growing professionally and actively contribute to delivering efficient technology solutions that positively impact the company's progress.

EDUCATION

Information Systems | Institut Teknologi Sepuluh Nopember

2022 – 2026

- Current GPA: 3.54/4.00 (145 Credits)
- Relevant Coursework : Database Engineering, Data Analysis & Science, Web Development, Application Development

PROFESSIONAL EXPERIENCES

PLTS Data Survey Engineer Intern | IKA Maju Sejahtera (PLN) 2026

Jun 2026 - Present

- Processed and analyzed geospatial datasets covering 485 remote locations across 3T regions in Indonesia to support spatial planning and location-based decision-making.
- Engineered automated spatial data pipelines using Python, GeoPandas, and GeoJSON to perform coordinate validation, point-in-polygon analysis, and administrative spatial matching.
- Validated geographic coordinates and demographic attributes by integrating boundary, population, elevation, and soil classification data to ensure spatial accuracy and dataset integrity.
- Develop interacted Web GIS visualization tools using Folium and Web GIS frameworks to enable dynamic coordinate exploration, regional identification, and spatial analysis for stakeholders.
- Collaborated on energy survey data management to streamline data preparation and geospatial reporting for rural electrification planning.

Software Developer Intern | Bank Indonesia KpW Jawa Timur 2025

Jul - Aug 2025

- Developed internal web-based dashboard applications and administration systems using [Next.js](#) and React to optimize operational data monitoring efficiency.
- Designed and integrated MySQL database architectures and REST APIs to ensure seamless data pipelines and system integration.
- Implemented Role-Based Access Control (RBAC) within the application to strengthen internal data security and improve user access management accuracy.
- Conducted system debugging, testing, and optimization to guarantee high reliability, scalability, and maintainability of the applications.
- Collaborated with multiple business units to analyze organizational requirements, and align technical implementations with Bank Indonesia's business processes.
- Modeled digital business workflows and operational processes to drive organizational efficiency and streamline bureaucracy.

Information Technology Intern | Piramida Teknologi Informasi 2025

Jan - Mar 2025

- Analyzed and digitalized corporate business processes for PT Pembangunan Jawa-Bali (PJB) by building functional workflow applications based on JavaScript using Camunda BPMN Modeler.
- Designed and mapped relational data flows to ensure accurate integration between BPMN process models and backend system requirements.
- Collaborated with system analysts and stakeholders to translate complex client business requirements into structured technical documentation.

- Conducted system testing and debugging on workflow schemas to minimize logical errors and ensure optimal application reliability before deployment.

PROJECTS

Development of an Ontology-Based System for Umrah Package Recommendations On A Web Platform (Undergraduate Thesis)

- Developed an ontology-based recommendation system using [Next.js](#), MySQL, and Semantic Web Rule Language (SWRL) to deliver structured, personalized package matching. Achieved a 1.00 Content Validity Index (CVI) score from expert validation and an 84.38 System Usability Scale (SUS) score, classifying the application in the “Excellent” category.

IT Balanced Scorecard Performance Monitoring Dashboard (Academic Project)

- Developed an interactive IT performance monitoring dashboard for PT Sandya Networks Indonesia using Microsoft Power BI based on the IT Balanced Scorecard (IT-BSC) framework and ADDIE methodology. Formulated Key Performance Indicators (KPIs) across four perspectives: Company Contribution, User Orientation, Operational Excellence, and Future Orientation, and generated simulated datasets to build multi-level visualizations, enabling dynamic drill-down performance monitoring across headquarters and regional branches.

Vehicle Routing Problem Optimization System Using GA, ACO, and 2-Opt (Academic Project)

- Developed a vehicle routing optimization system using Python to implement Genetic Algorithm (GA), Ant Colony Optimization (ACO), and 2-Opt methods, minimizing delivery distances across multiple transportation scenarios. Conducted a comprehensive comparative analysis of algorithm efficiency and engineered route visualization tools to evaluate constraints and optimize distribution strategies

University Admission Business Intelligence Dashboard (Academic Project)

- Developed an interactive university admission monitoring dashboard using Microsoft Power BI and Pentaho Data Integration (PDI) to transform raw data into visual insights. Engineered automated ETL pipeline to extract, transform, and load regional and participant datasets, while implementing dynamic KPI indicators, demographic, visualizations, and drill-down analysis features to enhance reporting efficiency.

Airport Passenger Forecasting System Using SARIMA, LSTM, and Hybrid Models (Academic Project)

- Developed a time series forecasting system using Python to predict domestic passenger traffic, comparing SARIMA, LSTM, and Hybrid SARIMA-LSTM models. Performed exploratory data analysis (EDA) and data preprocessing method while evaluation prediction accuracy across seasonal fluctuations using multiple metrics to optimize forecasting performance.

ORGANIZATIONAL EXPERIENCES

Staff of Human Resource Development - HMSI ITS

Apr 2024 - Dec 2024

- Designed and executed soft-skill training programs for 240+ freshmen, while developing a standardized annual regeneration curriculum and competency assessment modules.

Head of Operational - Information Systems Expo! 2024

Mar 2024 - Oct 2024

- Coordinated 42 multidisciplinary staff to manage end-to-end operations, engineering new standard operating procedures (SOPs) that reduced technical errors and accommodated 500+ visitors.

Project Officer - Organizational Management Training HMSI

Aug 2024 – Oct 2024

- Spearheaded the planning and execution of management training for 92 organizational functionaries, achieving 100% Key Performance Indicators (KPIs) across attendance, knowledge improvements, and satisfaction metrics.

Vice Head of Logistics, Tools, and Equipment - Ini Lho ITS! 2024

Sep 2023 - Mar 2024

- Led 40 staff members in national-scale event logistics, developing a new internal tracking system that optimized inventory distribution and minimize asset loss risks.

LICENSES & CERTIFICATIONS

SAP S/4HANA with GBI 4.2 | SAP

- Demonstrated proficiency in core enterprise modules including Sales & Distribution (SD), Materials Management (MM), and Production Planning (PP).

DevNet Associate | Cisco

- Completed 25+ comprehensive hands-on labs in a virtual environment, mastering Python coding, Linux, API integration using Postman, network fundamentals, and infrastructure automation.

CCNA: Introduction to Network Course | Cisco

- Executed 50+ network simulation labs using Cisco hardware and Packet Tracer, gaining strong competencies in IP addressing, subnetting, routing protocols, and network security.

Data Science & Analytics – SQL For Data Analytics | MySkill

- Completed 36 video-based lessons and practical exercises, developing skills in SQL querying, data filtering, aggregation, joins, and analytical data processing.

Data Science & Analytics – Python For Data Analytics | MySkill

- Completed 43 video-based lessons and practical exercises, building proficiency in Python for data cleaning, transformation, analysis, and basic data visualization.

Data Science & Analytics – Power BI | MySkill

- Executed 42 video-based lessons and practical exercises, gaining skills in data modeling, dashboard creation, data visualization, and business insight reporting using Power BI.

SKILLS

Hard Skills:

- **Web Development & Frameworks:** Laravel, JavaScript, [Next.js](#), React, REST API, Supabase, Python, Network Infrastructure Automation
- **Data & Analytics:** MySQL, PostgreSQL, Data Analysis, Time Series Forecasting, Route Optimization, ETL, Pentaho Data Integration, Microsoft Power BI.
- **Business Process & Enterprise Systems:** SAP S/4HANA (SD, MM, PP), Business Process Modelling (BPMN), Camunda BPMN Modeler, System Analysis, SAP ERP.
- **Cloud & Network:** Google Cloud Platform (GCP), Cisco, IP Addressing & Subnetting, Network Security

Soft Skills: Leadership, People Management, Problem Solving, Public Speaking, Cross-Functional Collaboration

Preferred Role: Web Developer, Data Analyst, Systems Analyst.

LANGUAGES

Bahasa Indonesia : Native

English : Fluent (520 TEFL ITS Score)
